Indicators Used

INDICATOR	DESCRIPTION AND HOW IT WAS CALCULATED
Graduation Rate	Graduation rate is calculated as the percentage of first-time, full-time undergraduate business administration majors who completed their program within 150% of the time for the program (i.e., within six years). Fall 2017's cohort of first-time freshmen is the data used for this graduation rate within 150% completion time. (Total number of graduates (5) divided by total number of full-time, first-time business administration freshmen in fall 2017 (15) provides the quotient (0.333), which then is multiplied by 100 (33.3) and rounded to the nearest one (33%).
